

Beauty. Style. Exclusivity. Luxury.

These words take new meanings at 100 Clifton Hill.

This elegant (6,527sq.ft) London townhouse has been authentically restored to its former glory. Blending the very finest of classic and modern traditions, it is now a sumptuous, spacious and impressive family home. From the moment you step inside, your eye follows the line of the spectacular staircase - suspended as if held by air. The careful balance of light and shade, the spacious setting and exquisite detailing blend with sensual fabrics and furnishings hand picked from far-flung corners of the world. The quality and craftsmanship are seen in the curved bay windows, glass balcony and garden. Calm, comfortable, elegant, this can only be a Kelly Hoppen design. This property redefines the concept of a family home. It is a place of possibility, splendour and effortless living.
